Garo Vartabedian

Software & Automation Developer · Customer-Facing Technical Delivery

garo.vartabed@gmail.com | 718-872-8578 | Austin, Texas
linkedin.com/in/garovartabedian | github.com/Vartabg | garovartabedian.com/hire

SUMMARY

Independent developer building web applications, workflow automation, and research tools in Python and TypeScript. Combines software delivery with field engineering experience commissioning customer systems, diagnosing failures, and coordinating technical handoffs. Recent work includes AI-agent coordination, human-reviewed application workflows, and source-linked knowledge tools. U.S. Navy veteran.

TECHNICAL PROOF

Merge Monitor - A local coordination board for AI coding agents.

JobPilot - An ATS-first application copilot that keeps a human in the loop.

garovartabedian.com - An eight-world research site that doubles as engineering proof.

EXPERIENCE

Independent Software & Web Developer | May 2022 - Present
Self-Employed | *Austin, TX*
Build and maintain independent projects with React, Next.js, Python, TypeScript, APIs, and browser automation.

- Merge Monitor: built a local agent coordination board with MCP and terminal access, persistent decisions, and distinct acknowledgment/resolution steps; demonstrated an agent-to-agent verification handoff.
- JobPilot: built a Python/SQLite workflow to ingest job postings, score fit, prepare tailored application drafts, and track the queue, with human review and submission.
- Research platform: shipped garovartabedian.com with generated source data, searchable texts, offline reading, and source-attributed exports for research and NotebookLM.
- Web products: built ATXBro and EYE; added keyboard access, semantic controls, reading preferences, and automated accessibility checks across the projects.
- Since December 2024, added AI and agent workflows with explicit human-review boundaries.

Overnight Valet Attendant | Jul 2026 - Present
Evolution Parking & Guest Services | *Courtyard & Residence Inn, Downtown Austin*
Guest-facing overnight valet operations.

Career Transition | 2020 - 2022
Independent
Began software and web development during this period.

Field Service Engineer | Oct 2016 - Jul 2020
View, Inc. | *Milpitas, CA*
Commissioned enterprise smart-glass deployments across the US, Canada, the UK, and the EU, including controller configuration and BMS integration.

- Coordinated glaziers, electricians, general contractors, site staff, building managers, and customers against deployment deadlines.
- Handled service calls on live buildings, facilities-vendor onboarding, repair cleanup, and customer-facing product demos.

Sales & Business Development | 2013 - 2016
TrimTabs Investment Research · GigaOM · Westgate · Monitronics
Sales and business-development work across investment research, technology research, timeshare, and home security.

Full-Time Student | 2009 - 2013
Queensborough Community College to Columbia University | *New York City*
Full-time undergraduate study.

Customer Service Engineer | Nov 2008 - Jun 2009
Christie Digital | *NY / NJ / CT*
Commissioned and maintained digital-cinema installs during the industry's transition from 35mm film to digital.

- Provided direct customer support and 24/7/365 on-call coverage for live theaters.

Electronics Technician | Feb 2003 - Aug 2008
U.S. Navy
Electronics maintenance work and a foundation in disciplined troubleshooting.

EDUCATION

Columbia University | BA, Philosophy | 2013

Queensborough Community College (CUNY) | AS, Business Administration | 2011
